

The [Anker 511 Charger Nano 3 30W](#) is a compact and powerful charger that uses GaN (Gallium Nitride) technology to deliver up to 30W of power in a small form factor. It is designed to charge a wide range of devices including smartphones, tablets, laptops, and other USB-C powered gadgets. Here are the key features and specifications:

- Power: 30W Power Delivery for fast charging
- Technology: GaN technology allows a smaller charger size, about 70% smaller than a traditional 30W charger
- Size: Approximately 1.12 inches thick, compact enough to fit between larger plugs on a power strip
- Port: 1 USB-C port
- Compatibility: Supports charging for iPhones, Samsung Galaxy phones, Google Pixel, iPads, laptops such as MacBook Air/Pro, Dell XPS 13, and other devices like Nintendo Switch and GoPro
- Charging Speed: Can charge iPhone 13 Pro/Pro Max at full-speed 30W or iPad Air (5th Gen) to 50% in 45 minutes; also supports Samsung Super Fast Charging (25W)
- Safety: Equipped with Anker's ActiveShield 2.0 technology for temperature monitoring (up to 3 million times daily), overcharge protection, short circuit protection, and temperature protection
- Environment: Packaging uses up to 90% less plastic, printed with natural soy-based ink, and is 100% recyclable
- Weight: Approximately 0.11 lb

This [charger](#) is praised for its reliability, fast charging, and portability, making it an excellent option for everyday charging needs on the go.
